

Ontario Genomics

You Can and Must Understand Synthetic Biology NOW

ANDREW HESSEL

**AUTODESK DISTINGUISHED RESEARCH, BIO/NANO
RESEARCH GROUP**

Andrew Hessel is a futurist and catalyst in biological technologies, helping industry, academics, and authorities better understand the rapid changes happening in life science. He is a Distinguished Researcher with **Autodesk** in their Bio/Nano Research Group, based out of San Francisco, on the core team of the Genome Project-Write proposal advocating for large genome synthesis and design technologies, and an advisor to several bio-based startups and incubators.
