

CELL & SYSTEMS BIOLOGY SEMINAR

**Dr. Juan Pablo
Arroyo Ornelas**

Vanderbilt University Medical Center

**VASOPRESSIN AND PKD
– WHAT'S WATER GOT
TO DO WITH IT?**

FRIDAY

FEBRUARY 28, 2025

1:30 - 2:30 PM

**PGCRL
Event room 1**

Juan Pablo Arroyo Ornelas, MD, PhD is an Assistant Professor and Staff Physician at the Vanderbilt University Medical Center department of Nephrology. He completed his PhD in Biomedical Science at the UNAM in Mexico City in Dr. Gerardo Gamba's lab where he studied sodium transport in the kidney. He then completed a postdoctoral fellowship with Dr. Richard Lifton at Yale University. Dr. Arroyo's goal is to use a mechanisms-of-disease approach to understand how water regulates metabolism and improve the treatment of kidney disease, obesity, and diabetes.

Hosted by : Dr. Mathieu Lemaire
