

IDCCM Visiting Professor Rounds

Tuesday November 23, 2021

3:00 pm - 4:00 pm

Via ZOOM!

“30 years of echocardiography in the ventilated patients. The key messages”

Professor Antoine Vieillard-Barron

Head of Intensive Care Medicine
University hospital Ambroise Paré
Boulogne-Billancourt, France

Objectives:

1. To understand the concept of heart-lung interactions.
2. To understand mechanisms supporting heart-lung interactions and the limits of invasive monitoring for their adequate understanding and description.
3. To understand why and how echocardiography may advantageously replace pulmonary artery catheter to describe heart-lung interactions.
4. To illustrate with some clinical applications that echocardiography is then perfectly suitable for hemodynamic monitoring, especially in the mechanically ventilated patients.

How to join:
