

BiophysTO Lunchtime Seminar Series

Date

Thursday, Sept 29, 2022
12:00 – 1:00 pm

Location

Virtual via zoom

Dr. Kalle Gehring

Department of Biochemistry
& Centre de Recherche en Biologie Structurale
McGill University

Control of Protein Function by Phosphorylation

Protein phosphorylation regulates a vast array of biochemical processes through control of protein conformation, protein-protein association and protein localization. The talk will present examples of these from structural studies of the PINK1/parkin and PRL/CNNM pathways.
