

The background image shows the classical facade of the Princess Margaret Hospital. It features a central pediment with a coat of arms, flanked by columns. Below the pediment, a stone inscription reads "ERECTED" on the left, "PRINCESS MARGARET HOSPITAL/HÔPITAL" in the center, and "A.D. 1915" on the right.

Princess Margaret Special Seminar

*NMR-guided discovery of allosteric inhibitors of
cancer-relevant targets*
