Unexpected Catalysis for RNA and DNA: Roles in Biology?

Several unexpected catalytic activities for RNA and DNA raise questions about the range and scope of biocatalysis, the origin of life on the early earth, and the ongoing relevance of these catalytic activities to the biology of extant organisms.

Dr. Dipankar Sen

Dept. of Chemistry and Dept. of Molecular Biology & Biochemistry
Simon Fraser University

Hosts: Dr. Charles Boone &
Dr. Sachdev Sidhu

Date: Thursday April 5th, 2018

Time: 1:30PM

Place: MSB Room 2172

1 King's College Circle
