

BiophysTO Lunchtime Seminar Series

Date

Thursday, Jan. 11, 2018
12:00-2:00

Location

Davis Building 3129
UTM Campus

Streaming

Seminar livestreamed
to MP606 @ St. George

**Pizza & refreshments
provided**

Dr. Vito Mennella

Biochemistry, U of T and Sick Kids

Super-resolution Imaging Toward Diagnosis, Mechanism and Discovery of Rare Diseases

Dr. Vito Mennella will discuss how his laboratory leverages super-resolution imaging and data analysis methods for the analysis of supramolecular assemblies in cells. His research program has been focusing on organelles, such as cilia and centrosomes, whose function is responsible for inherited lung diseases and microcephaly, respectively. He is currently an Assistant Professor in the Biochemistry Department at University of Toronto and Research Scientist at the Hospital for Sick Children.

Host: Dr. Joshua Milstein
